Overview of Creating/Editing a CAS Record

This guide provides an overview of how to create and edit a Non-audit CAS (Cost Accounting Standard) Record within AT-AT.

The Non-audit CAS Record may be [Created](#) by:

- AT-AT – Monitor
- AT-AT – Contracting Officer
- AT-AT – Region/HQ Monitor

The CAS Record is assigned to an AT-AT – Contracting Officer during the create process. The CAS Record may be reassigned to another AT-AT – CO after creating the record.

The roles that may [Edit](#) the CAS Record and is managed by [span of control](#):

- AT-AT – Monitor
- AT-AT – Contracting Officer
- AT-AT – Region/HQ Monitor

NOTE: “Span of Control” - is the ability to view or create/edit content inside the PIEE Suite. The span of control is evaluated based on the user’s role’s registered Location Code/Group following the hierarchy.

[Create / Record Details](#) tab fields:

[Estimated SOL Date](#)

Field is automatically calculated 6 years from the Estimated Accrual/Notice Date and accounts for leap years.

Ex. if Estimated Accrual/Notice Date is 2019/01/01, then calculated Estimated SOL Date should be 2024/12/31.

[CAS Priority Level](#)

Auto-calculated based upon the Estimated SOL Date compared to the current system date.

For the purpose of this calculation a "year" is calculated as full year no matter if it's a leap year - we need to account for the additional day for the leap year (e.g., if January 1, then year ends December 31)

The values for CAS Priority Level will be 1, 2, 3, 4, or 5 and will be calculated as follows:

The CAS Priority Level will be set to "5" (Priority Level 5) when the calculated difference between the Estimated SOL Date and the current system date is more than four (4) years.

The CAS Priority Level will be set to "4" (Priority Level 4) when the calculated difference between the Estimated SOL Date and the current system date is more than three (3) years, but less than or equal to four (4) years.

**Additional Field
Information**

The CAS Priority Level will be set to "3" (Priority Level 3) when the calculated difference between the Estimated SOL Date and the current system date is more than two (2) years, but less than or equal to three (3) years.

The CAS Priority Level will be set to "2" (Priority Level 2) when the calculated difference between the Estimated SOL Date and the current system date is more than one (1) year, but less than or equal to two (2) years.

The CAS Priority Level will be set to "1" (Priority Level 1) when the calculated difference between the Estimated SOL Date and the current system date is one (1) year or less than one (1) year.

If Estimated SOL Date has past based on the user's system date, CAS Priority Level should remain at "1".
