This presentation is an overview of a ECP0842, Use of Alternative Fuels on the Quality Tab.

For an Energy Receiving Report, the user will be able to add more than one Sub-Commodity for each Commodity entered on the Statement of Quality Tab.

A delete option has been added to delete the Sub-Commodity once added.

The expand/collapse functionality on the Statement of Quality tab will be based on Line Item and Sub-Commodity to account for multiple entries.

This concludes our demonstration.
